

How to Set Electrum to Testnet

Step 1: Ensure Electrum is installed on your computer. If not, download and install Electrum for your operating system from <https://electrum.org/#download>

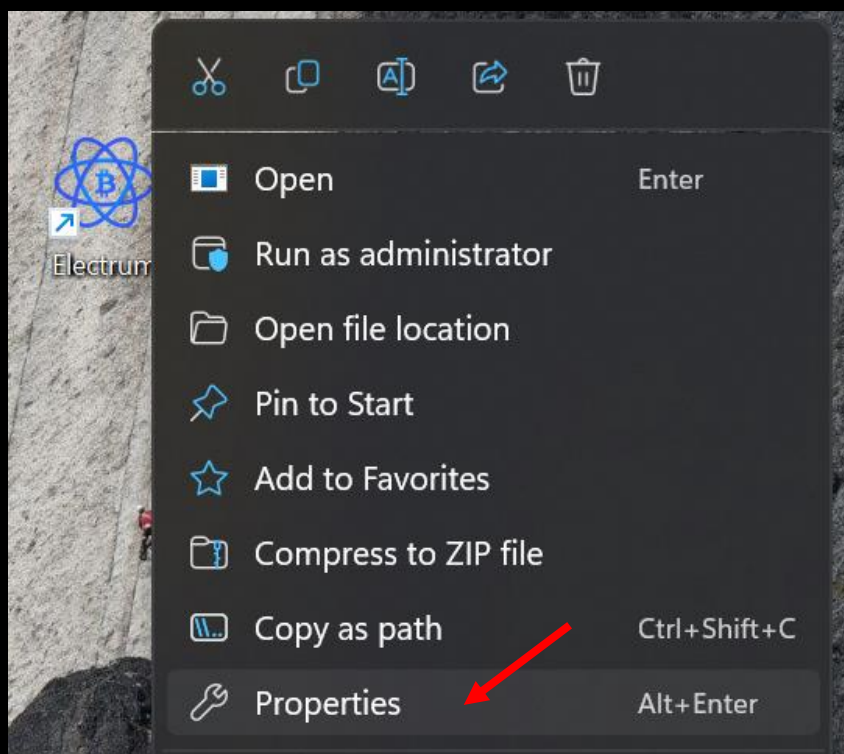

Step 2: A shortcut for Electrum will appear on your desktop screen, right click on it and click "Copy".

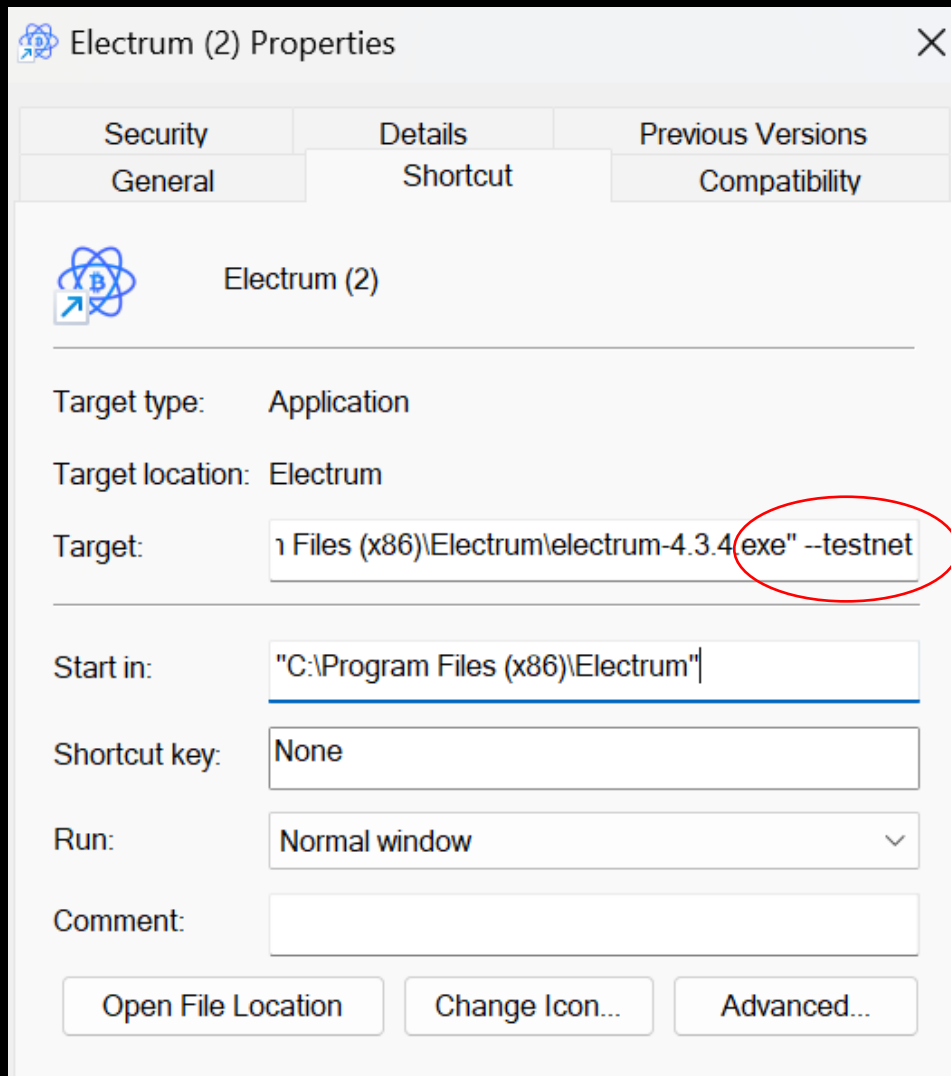

Step 3: Right click on your desktop screen and select “Paste shortcut”. You will now have two Electrum shortcuts.

Step 4: Right click on your new Electrum shortcut and select "Properties".

Step 5: Navigate to the "Shortcut" tab. In the "Target" field add "--testnet" after the text, as shown below. Then click "OK".

Step 6: Now if you click on your new Electrum shortcut a dialog box warning you're in Testnet mode should appear. The top left corner of the Electrum window will also state "Electrum Testnet".
